

Dear FCC: The absurdity of the NAB petition simply boggles my mind. Why must progress in the form of something truly helpful to large numbers of people be quelched to benefit other stations that have put forth no effort to listen to or appease their constituents. XM Radio has truly made my family feel like we're part of a 'global village' and has only worked to improve the quality of service they deliver. XM has liberated us from the mind-numbing banter of FM and AM station jockeys, the ever-increasing volume of inane commercial interruptions and poor quality of music - it places the choice in our hands, not in those of a station director with an agenda. Please do not take that liberty and choice from us. A successful passing of 04-160 would surely place XM one step further down the slippery slope into restrictions so prohibitive that they could no longer survive. I spend 2 hours of my life a day in traffic commuting to work and back - please do not take away the ONLY good thing about my commute!
